

WEB3SY

ONLINE TECHNOLOGY AFTER-SCHOOL CLUBS FOR
KIDS AGED 8-15

DELIVERING NEXT-GENERATION STEM LEARNING EXPERIENCES SINCE 2023

WHO WE ARE

Web3sy introduces young tech enthusiasts aged 8–15 to emerging technologies through online after-school clubs, workshops and a technical blog. Learning fit for every schedule.

Through weekly after school sessions, students learn about technologies of the future from IoT to Quantum Computing, *before* traditional curriculums. Web3sy brings emerging technology education straight to the desktops of the bright thinkers of the next generation, engaging inquisitive minds and igniting curiosity, with specially curated learning programs across a variety of emerging fields.

FAQ

How do you ensure safeguarding during your courses? Are your tutors DBS checked?

Safeguarding is a top priority at Web3sy. All of our tutors hold enhanced DBS certificates and go through a careful selection process before working with students. We choose instructors not only for their technical expertise, but also for their passion for education and their ability to inspire young learners.

Each tutor is trained to create a safe, supportive, and engaging learning environment. Our instructors are emerging thought leaders in the fields of AI, Software Engineering, Web3, and Quantum Computing, allowing your child to learn from some of the brightest minds in the industry.

Where do courses take place?

Online courses take place on Zoom. Relevant information regarding setup and resources needed in advance of the courses will be emailed to parents/guardians beforehand.

OUR AFTER-SCHOOL CLUBS

Web3sy After School Clubs are fun, interactive learning journeys designed to spark curiosity and build foundational tech skills. These programmes help children strengthen their confidence, creativity, and problem-solving abilities—while developing projects and skills they can later showcase in personal statements, digital portfolios, and school applications.

CLUB DETAILS

- **AGE RANGE:** 8 – 15 years old
- **TERM:** Each track lasts 4 Weeks
- **DURATION:** 1 hour 30 minutes per week
- **LOCATION:** Live delivery in small groups via Zoom

SAFEGUARDING AND ONLINE SAFETY

- Your child learns on secure platforms (Zoom) and is led by DBS-checked tutors.
- All classes are monitored in real time with strict privacy and child-protection practices for a safe, age-appropriate experience.

1

AI Explorers

🚀 Ignite your child's curiosity with hands-on AI projects, live expert-led sessions, and real-world tech skills. Designed for ages 8–15, this four week online club introduces fundamental artificial intelligence and machine learning concepts, complete with a chatbot coding practical project.

Perfect for young explorers looking to explore Artificial Intelligence and Machine Learning in a fun, supportive environment.

Web3 Wizards

2

🧙 Give your 8–15 year old a head start in the future of the internet! In this interactive online club, learners dive into the world of Web3—exploring Blockchain, NFTs, Smart Contracts, and Decentralised Apps. No prior knowledge needed—just curiosity and a sense of adventure!

Developed for young minds eager to learn how blockchain, NFTs and Decentralised finance power tomorrow's applications.

3

Curious Creators

🌟 Give your 8–15 year old a head start in the future of tech! Each 90-minute online session introduces a new emerging field—from Neurotechnology to Quantum Computing and AR/VR. This is a unique opportunity for curious young minds to explore exciting technologies, build confidence, and discover what inspires them.

From the Internet of Things to Astronomy and Space, our Curious Creator track has something for everyone.

Bio-Hazards!

4

🧬 Unlock the secrets of life science with hands-on biotechnology projects, live expert-led sessions, and real-world problem-solving. Designed for ages 8–15, this four-week online club introduces DNA forensics, genetic engineering, and the ethical questions shaping our biological future.

Perfect for budding scientists, problem solvers, and creative thinkers who want to learn about the world of biotechnology and genetic engineering.

5

Web Development

🌟 Develop some real world skills with our 6-week Web Development introductory bootcamp. Students will learn the languages that built the internet; HTML, CSS, JavaScript, and explore no-code tools such as WordPress, culminating in a final project where they publish a website.

Excellent early-in-career preparation for students interested in Software Engineering or Web Development.

OUR IMPACT

Trusted by Hundreds of Parents and Learners!

"Using Web3sy to learn about NFTs was really fun. I liked the Kahoot quizzes because I could play with my friends."

—**Melac Al-Ghafari, 13** ★★★★★

"Our students loved the Web3sy Artificial Intelligence workshops, which were well put together, educational, engaging and informative."

—**Soapbox Islington** ★★★★★

"Web3sy's STEM learning program provided positive impact on the young people from the Eritrean Youth Club (EYC). The program provided valuable problem-solving skills, and nurturing of curiosity and technical thinking."

—**Maria Ghile – Eritrean Youth Club Director** ★★★★★
